

WipeUp: Next-Gen Clean

Creating a new category in personal hygiene—dry or wet paper on demand, with zero zero plumbing.

STAND-ALONE. BATTERY-POWERED. 100% FLUSHABLE.

The Global Hygiene Compromise

Dry Toilet Paper

- Incomplete clean
- Causes skin irritation
- Lacks sanitization

Wet Wipes

- Severe plumbing & environmental damage
- Non-flushable
- Harsh chemical preservatives
- Expensive for daily use

Bidets

- Complex, permanent installation
- Requires dedicated water lines & electricity
- Intensive ongoing maintenance

The Missing Middle: Category Creation

Features	Dry TP	Wipes	Bidets	WipeUp
Complete Cleanliness	✗	✓	✓	✓
100% Flushable & Eco-Friendly	✓	✗	✓	✓
Zero Plumbing / Infrastructure	✓	✓	✗	✓
Preservative-Free Formulation	✓	✗	✓	✓
Low Recurring Cost	✓	✗	✓	✓

The Solution: Meet WipeUp

Premium Interface

One-touch selection for instant wet or dry paper.

100% Standalone

Powered by 2 standard AA batteries (8-12 month lifespan). Requires zero water lines or electrical outlets.

Micro-Mist Technology

Dispenses an exact, hygienic mist directly onto proprietary, flushable multi-layer paper.

Drop-in Ready

Mounts cleanly to any wall in minutes.

The Ecosystem Engine: Recurring Revenue

Unit Economics per Household:

- ~90 rolls + 6 bottles consumed annually
- ARR: \$93 per device
- Total Year 1 Revenue per user: \$143

Proprietary Innovation: How It Works

1. The Spiral Path

A proprietary 450mm internal spiral track completely isolates wet and dry zones, preventing moisture bleed and paper lamination.

2. Targeted Micro-Mist

Metered pumps dispense an exact 30-50 μ m droplet mist exclusively onto the center of the paper segment.

3. Smart Cut

A hidden 23-degree ceramic blade syncs with paper transport to cut exactly on a 2cm dry margin. Perfect detachment with zero tearing.

Defensible Ecosystem: Anti-Bypass Tech

Ensuring 100% cartridge and paper retention.

Anti-Bypass Hardware

- **Asymmetric Hollow Sleeve:** Paper rolls feature a proprietary 3D geometric POM/glass-fiber core. The device physically rejects standard toilet paper.
- **Sealed Liquid Cartridges:** 250ml eco-friendly, non-refillable Bag-on-Valve cartridges prevent third-party refills and ensure pristine sanitization.

Digital Verification

- **Smart MCU Integration:** Built-in IR sensors and rotational encoders.
- **Counterfeit Detection:** Immediately disables the misting pump if third-party components or empty cartridges are detected.

Adaptive Configurations: TAM Expansion

A core hardware platform adaptable to multiple high-value demographics.

Baby & Toddler:

Features extra-wet mode, hypoallergenic mist, and one-handed operation. Replaces expensive, harsh baby wipes.

Kids & Schools:

Regulated segment lengths, robust anti-vandalism housing, and locked cartridges to prevent waste and tampering.

Premium Home / Adults:

Customized mist levels, sleek aesthetics, and touch-panel controls for luxury residential use.

Elderly & Care:

Easy-pull mechanisms and automated dispensing to assist users with limited motor functionality.

The Global Premium Market

USA

Premium Market: \$2.8B–\$4.5B
Target Pen. (0.15–0.80%): \$60M–\$210M

EUROPE

Premium Market: \$2.1B–\$3.6B
Target Pen. (0.10–0.60%): \$32M–\$135M

JAPAN

Premium Market: \$400M–\$600M
High adoption of smart hygiene.

ISRAEL - Test Market

Premium Market: \$44M–\$66M
Target Pen. (0.30–1.20%)

Key Takeaway: A highly conservative global penetration rate of <1% generates tens of millions in high-margin recurring Year 1-3 revenue.

Go-To-Market Strategy

Partnering for global scale, not competing in the paper supply chain.

1. IP & Core Manufacturing

- WipeUp retains full ownership of the technology, patents, and manufacturing of the core electromechanical hardware.

2. Strategic Corporate Partnerships

Distribution is executed via strategic partnerships with existing global paper and hygiene conglomerates.

3. Co-Branded Penetration

WipeUp enters households rapidly through white-labeling or co-branding with universally trusted consumer hygiene brands.

The Moat: Intellectual Property

Global Strategy: Immediate global registrations planned for the US, EU, Japan, UAE, and Israel (85,000 ILS dedicated from current raise).

Traction & Current Valuation

The Ask & Use of Funds

Raising 900,000 ILS to transition from prototype to mass-market commercial scale within 6 months.
